13 Unique Clients

9 Client Success Stories

2 Large DevOps Implementation projects are ongoing

Security

We Are Part of Your Journey towards building Cyber Resilience Program

- Datamato accompanied with **IBM BigFix** provides faster and intuitive solution for compliance, endpoint and security management.
- Allows organizations to see and manage physical and virtual endpoints through a single dashboard, a single console and a single type of agent.
- With **IBM Q-Radar SIEM** Datamato facilitates a platform for security management that provides situational awareness and compliance report.
- Enables you to monitor and display network events in real time or perform advanced searches.
- We provide unified architecture that enables log management, anomaly detection, incident forensics, configuration and vulnerability management with reduced cost, improved accuracy and boosted productivity.

DevOps

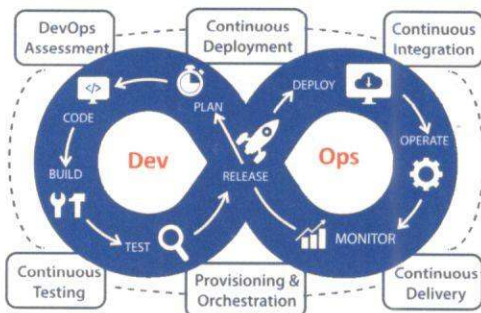

We are key partner for your **DevOps** transformation

We Do -

- **As-is-assessment** which drives the complete roadmap for DevOps
- Continuous Integration, Build & **Release Automation**
- **Deployment as a Service** DaaS (Unique Offering)
- Leverage IBM UrbanCode in conjunction amongst other tools and facilitates having an integrated and collaborative DevOps platform along with **Infrastructure as Code** (IAC)
- Accelerate your DevOps journey, be it Consulting, Managed Services or **SOW-based Projects**
